

STATUTORY CHECKLIST [§58.35(a) activities]

for Categorical Exclusions and Environmental Assessments

Note: Review of the items on this checklist is required for both Categorical Exclusions under Sec. 58.35(a) and projects requiring an Environmental Assessment under Sec. 58.36. If no compliance with any of the items is required, a Categorical Exclusion [58.35(a)] may become "exempt" under the provisions of Sec. 58.34 (a) (12). In such cases attach the completed Statutory Checklist to a written determination of the exemption. Projects requiring an Environmental Assessment under Sec. 58.36 cannot be determined to be exempt even if no compliance with Statutory Checklist items is found. Three items listed at Sec. 58.6 are applicable to all projects, including those determined to be exempt.

US Department of Agriculture Natural Resources Conservation Service (NRCS) mapping of soils indicates the presence of Poorly Drained and Very Poorly Drained Wetlands soils on site (Figure 6). Based on NRCS mapped soil types and field observations it appears tidal wetlands are likely located on the site. Fringe inland wetlands may be associated with tidal wetlands. Site-specific field assessment is required to make a definitive determination. The presence or absence of wetlands soils within the footprint
